General comment			Yoan shows great improvement over time. He was a little shy and passive in the beginning. As time passes he did improve himself a lot as we advised him to be more open and proactive about the research project. Early when we decided the project we knew that there would be real barriers. Even professional marketing researchers might not be able to find the data in China. He didn't give up and tried everything he could. Finally he found his own way out, which is to use the US data and modify it to fit China context. This is a real breakthrough and great help to the research that is being undertaken in the Engie China Lab. Yoan learns new things surprisingly fast. For example, he could learn how to use building energy simulation tool within only 2 weeks.
